

Centriforce

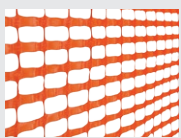

Barrier / Safety Fencing

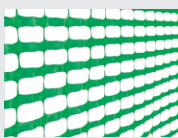

Centriforce barrier/safety fence is a brightly coloured, high visibility polypropylene mesh designed for cordoning off construction sites, sporting events and other areas where a degree of pedestrian or vehicle control is required.

The 1 metre high mesh fencing is normally erected using either steel fencing pins or wooden posts to provide an easily installed, robust and high visibility safety barrier in a wide range of construction and industrial applications.

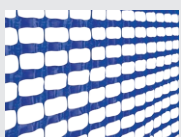

Standard Colours

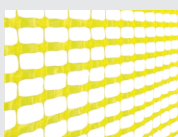

Orange

Green

Blue

Yellow

Weights

| | |
|--------|---------|
| Light | 5.5 kgs |
| Medium | 7 kgs |
| Heavy | 12 kgs |

Polymer

Polypropylene

Roll size

50m x 1m

Centriforce barrier/safety fencing is available in a range of colours and can be manufactured in various weights and grades to suit intended applications.

Advantages

- Full UK manufacture ensures consistent quality and quick order turnaround
- Produced from high quality polymer resins and pigments
- UV stabilised, high visibility colours
- Simple and fast to erect.
- Durable. Can be reused multiple times
- Available in a range of colours, widths and weights
- Custom manufacturing options

Typical applications

- Pedestrian and vehicle control on construction and building sites
- Widely used in industrial applications
- Sporting events and crowd control
- Effective perimeter guard for hazards/hazardous areas
