

# Centritape™

## High visibility barrier tapes

Centritape™ is a range of non-adhesive barrier tapes produced from high quality polyethylene polymers that are designed to provide cost-effective perimeter warnings around dangerous and controlled areas.

Manufactured in the UK, the hazard tapes are available as standard with black/yellow or red/white diagonal stripes.

We are also able to offer a bespoke service with tape printed to your own design with specific warning messages.

### Applications

- suitable for indoor and outdoor use
- accidents and emergencies
- construction sites
- factories and industrial premises
- outdoor events
- sports and recreation
- other crowd control applications

### Benefits

- high quality low density polyethylene polymers
- high visibility, clear warnings
- available from stock in standard designs
- fully UK manufactured
- custom manufacturing options

### Specifications
